

Eyemo Crash Package

Specs:
Eyemo crash box:
Length: 12"
Width: 8"
Height: 11 ¼"

Eyemo cameras, in crash housings, have proven to be one of the most cost effective ways to put a camera in harms way. They're small, lightweight, and relatively inexpensive to replace. Geo Film Group has been leading the way with some of the cleanest most reliable Eyemos in existence. Our Eyemos are fitted with crystal motors ranging in speed from 4-50fps, reflex viewing systems and black and white video assist. Our crash package includes a reflex Eyemo, standard crash box, (4) 12 volt batteries, extension cables, and a set of Nikon lenses (15mm, 18mm, 24mm, 35mm, 50mm). The package comes in 4 cases.
