

BODY MOUNT

Versatile Body Mounted Camera Rig

The Body Mount is a lightweight camera rig worn by an actor or stunt person. The mount allows both POV shots as well as 360° close up shots of the subject. The vest is adjustable to fit comfortably on both men and women. The carbon-fiber arms telescope in and out and come in two different lengths. The camera yoke has a ball leveling plate for last minute adjustments. The best part about this rig is it requires NO TOOLS. All adjustments are built in quick release or rosettes. It can be rigged in five minutes and re-rigged in two.

Specs:

Max Arm Extension: 48"

Min. Arm Extension: 25"

Weight: 14lbs.

Max. Camera Weight: approx. 10lbs.

Front Compressed

Rear Fully Extended
